## Temperature

1971-2000 AVG. HI: 78.1(F)
1971-2000 AVG. LOW: 58.6(F)
1971-2000 AVG. TEMP: 68.4(F)
June 2006 AVG. HI: 81.1(F)
June 2006 AVG. LO: 58.5(F)
June 2006 AVG. TEMP: 70.1(F)

## Precipitation

June TOTAL: 3.11 in
June AVG: 4.56 in.
SNOW: 0.0 in .
YEAR TO DATE: 17.44 in
YEAR TO DATE AVG: 17.62 in

## Degree Davs

COOLING: 6/06: 134
1/06-Now: 204.5
HEATING: 6/06: 33.5
7/05-Now: 6078
GROWING: 6/06: 550.5
1/06-Now: 1005

## Discussion

Following the end of May, which saw two $93^{\circ} \mathrm{F}$ and one $89^{\circ} \mathrm{F}$ highs for the last three days, a warm June may have been expected. This however was not the case as there were only two $90+^{\circ} \mathrm{F}$ days during the month of June. These occurred on the $17^{\text {th }}$ and $18^{\text {th }}$ and both of these days barely made it into the $90^{\circ}$ bracket with both readings at $90^{\circ} \mathrm{F}$. These two warm days were preceded a week earlier by the coldest temperatures of the month with the coldest low of $45^{\circ} \mathrm{F}$ occurring on the $10^{\text {th }}$, and the coldest high of $60^{\circ} \mathrm{F}$ on the $11^{\text {th }}$. Other than this span of days from the $10^{\text {th }}$ through the $18^{\text {th }}$, the temperatures during the month of June were within a few degrees either side of the 30 -year average.

Precipitation was hard to come by during the first half of the month with only three days of measurable rain through the $15^{\text {th }}$. However, when it did rain, it more than made up for it with $1.63^{\prime \prime}$ falling on the $10^{\text {th }}$. A string of seven days out of eight with rain beginning on the $21^{\text {st }}$ helped bring up rain totals for the month, but the monthly total was still 1.45 " below the 30-year June average of 4.56 ".

June 2006 was ranked $22^{\text {nd }}$ warmest based on the average temperature from 1966-2006. It was also the $27^{\text {th }}$ warmest based on high temperatures, $16^{\text {th }}$ coolest based on low temperatures, and the $12^{\text {th }}$ as the driest. Overall, June 2006 was near the 30 -year average for temperatures and below average for rain.
