## Discussion

October 2009 was unseasonable cool. The average high temperature for October 2009, 54.2 degrees, is ranked 1 st for coolest average high temperature and is almost 9 degrees cooler than the average high for October. The average overall temperature was also well below normal, ranking third all time for the coolest average temperature for October. There were nine days during the month that the high temperature failed to reach 50 degrees.

October 2009 experienced a considerable amount of precipitation. There were twenty days of measurable precipitation totaling 6.40 inches. The monthly total is 3.8 inches higher than the average precipitation for DeKalb in October. October 2009 ranks second all time with regard to precipitation. Also after another record breaking month, DeKalb is now nearly ten inches above the year-to-date average for this time of year. Another note, on October $10^{\text {th }}$ DeKalb experienced its first snow fall of the year with a trace.
