| May 2010 AVG. TEMP: 61.8(F) | 2009-10 Seasonal SNOW TO DATE: 42.9 in. Seasonal SNOW AVG: 35.0 in. | 1/10-Now: 564.5 |
| Discussion |  |  |
| The May 2010 average temperature of 61.8 degrees was 1.9 degrees above the 30 -year (1971-2000) historical average of 59.9 degrees. The indication is that mild nights were the main contribution to the above-average temperature since this May's average low temperature was 51.7 degrees and 3.4 degrees above the historical average, while this month's average high temperature of 71.8 degrees was only 0.3 degrees above the historical average. The first week of the month had near- to above-average temperatures; in contrast, the mid-month period from the $8^{\text {th }}$ to the $19^{\text {th }}$ featured well below-average temperatures. Well above-average temperatures-including the first temperature of 90 degrees or higher of the year (and since 28 June 2009 ) on the $24^{\text {th }}$ and a record high and second highest temperature of the last three years on the $25^{\text {th }}$-were recorded during the month's last week. |  |  |
| The monthly total liquid-equivalent precipitation of 5.60 in . was well above the historical average, and, thus, this May is the $8^{\text {th }}$ wettest on record since 1948 . However, approximately 90 percent of the month's rain fell during the first half of the month, particularly during the second week. On the $13^{\text {th }}, 2.41$ in. was recorded, which made this 13 May the wettest on record since 1948. Year-to-date rainfall is currently 12.82 in., which is near-average at 97 percent of the historical average. Soil moisture conditions are generally favorable at this time as indicated in the 29 May NOAA Climate Prediction Center Crop Moisture Report that showed "slightly dry/favorably moist" soil conditions over all northern Illinois. |  |  |
| The Spring 2010 average temperatur and 1985 , respectively; the total liqui | above the historical average of 48.4 degrees and $m$ which is 0.63 in . above the historical average of 10 | since 1948 after 1977, 1965, st on record since 1948. |
