## Temperature

1981-2010 AVG. HI: 75.3(F)
1981-2010 AVG. LOW: 52.8(F)
1981-2010 AVG. TEMP.: 64.1(F)
Sept. 2011 AVG. HI: 70.0(F)
Sept. 2011 AVG. LO: 50.9(F)
Sept. 2011 AVG. TEMP.: 60.4(F)

## Precipitation

Sept. 2011 TOTAL: 3.83 in.
Sept. AVG.: 3.16 in.
Sept. 2011 SNOW: 0
Sept. SNOW AVG: 0
2011 liquid-eq. YEAR TO DATE: 34.77 in . liquid-eq. YEAR TO DATE AVG.: 29.98 in. 2011-12 Seasonal SNOW TO DATE: 0 Seasonal SNOW TO DATE AVG.: 0

## Discussion

September 2011 featured temperatures much below the historical (30-year, 1981-2010) averages. The monthly mean temperature of 60.4 degrees tied with 1902 for eighth lowest on record since 1896.The lowest September monthly mean temperature occurred in 1918, when it was 57.5 degrees. It was cool days that contributed to this strong negative anomaly in the overall mean temperature; in fact, the monthly average high temperature of 70.0 degrees ranked third lowest on record after 1896 and 1924, lowest ( 68.3 degrees) and second lowest ( 69.3 degrees), respectively. The first four days of the month had temperatures above the historical averages as did the period between the $12^{\text {th }}$ and $13^{\text {th }}$. Otherwise, temperatures were consistently below the historical averages. Indeed, early frost was reported in some areas just outside DeKalb on the morning of the $15^{\text {th }}$.

September featured a liquid-equivalent precipitation total above the historical average. It totaled 3.83 in ., some 121 percent of the historical average of 3.16 in. About 72 percent of that total ( 2.76 in .) was realized between the $26^{\text {th }}$ and $29^{\text {th }}$ in association with a "cut-off" upper-level cyclone that resided over the Great Lakes region for several days.
