Discussion

April 2014 had temperatures near the historical (30-year, 1981-2010) averages, with only six days that were 10 degrees or greater above these historical averages. However, April is the sixth consecutive month with below average temperatures. The average high this month was 58.6 degrees, which is just below the average of 59.5 degrees. The average low was 35.6 degrees, which is just below the average of 37.8 degrees. The average temp was 47.1, which is also below the average of 48.7 degrees.

April had a 2.75 in. precipitation total about a half an inch below average. Precipitation amounts were scattered throughout the month. In the middle of the month, 1.3 in. of snowfall was recorded; the historical-average total is 0.8 in.

Year-to-date precipitation as of 30 April was 7.55 in., which is almost an inch below the historical-average total of 8.54 in.

Finally, we have had our first growing degree days of the year, with a total of 8 days this month.
