## Discussion

Overall, June 2015 had below average temperatures for most of the month. The average temperature was 67.2 degrees which was below the historical average by 2.5 degrees. The average high temperature was 76.7 degrees which was 3.6 degrees below the historical average. The average low temperature was 58.3 degrees and was 0.7 degrees below the historical average. June $11^{\text {th }}$ was the only day that exceeded 90 degrees.

June 2015 ranked $6^{\text {th }}$ for the highest amount of precipitation in the month of June since 1895 . This marks the second year in a row that we have had top six precipitation amounts for the month of June. There were 8.20 inches of precipitation which is 4.02 inches above the historical average for the month of June. Year to date precipitation stands at 20.48 inches which is 3.21 inches above the historical average. June $12^{\text {th }}$ through the $18^{\text {th }}$ accounted for $75.7 \%$ of the monthly precipitation. Also, June $16^{\text {th }}$ had the highest single day precipitation amount at 2.15 inches which was just over a fourth of the monthly precipitation.
